(54) MEDICAL CATHETER CONTAINING INORGANIC CRYSTAL**(57)Abstract:**

PROBLEM TO BE SOLVED: To provide a catheter shaft made of a polyimide in which elongation is improved without impairing the modulus of elasticity.

SOLUTION: A medical catheter is made of an inorganic crystalline composite material in which an inorganic crystal is contained in the polyimide. The catheter is excellent in pushability and trachability.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
